

"Onda" hose bellows

"ONDA" HOSE BELLOWS WITH STEEL CLAMPS

Exhaust gas hose bellows with wave design are unique products resulting from years of research and development by CO.FE.ME. aimed at producing a reliable product above all current standards.

The special compound and wave design used for our "Onda" hose bellows make them unique

The unique features include:

- versatility
- resistance to vibrations
- resistance to expansion, compression and cutting
- resistance to tough environmental agents (sea air and water)
- easy to assemble

The "CO.FE.ME. Onda" hose bellow is registered by the Italian Naval Register (RINA), the authority which updates regulations for the classification of vessels and certifies systems and products.

Why use "CO.FE.ME. Onda" hose bellow?

- the material was specifically designed to be tear-resistant
- the discharge system is cut off from vibrations and movements of the motor
- no line-up problems
- resistance to axial/cutting fatigue
- easy to assemble and disassemble

"CO.FE.ME. Onda" hose bellows are supplied with 4 T-seal clamps.

"ONDA" HOSE BELLOW
